# Process Valve Solutions

Specialist in Manual and Actuated Valves

# Our Promise

---

We have established a long-term relationship with all major valve manufacturers.

Combining this relationship with our experience, you can be assured that we will match your specification requirements with the perfect product.

Should you not be able to find the perfect match to your needs, we have the expertise to be able to have such item custom built and tested; achieving all 'British Standards' marks of approval.

# About Us

---

Process Valve Solutions is a well established Southern UK based company with a full UKAS ISO accreditation supplying products such as Ball, Butterfly, Gate, Globe, Check and Diaphragm Valves along with Pneumatic and Electric Actuators, Switchboxes and Positioners by world-class manufacturers into all sectors of the industry.

## Our Industries

- Air and Water Treatment
- Tobacco
- Petrochemical
- Pharmaceutical
- Food Industry

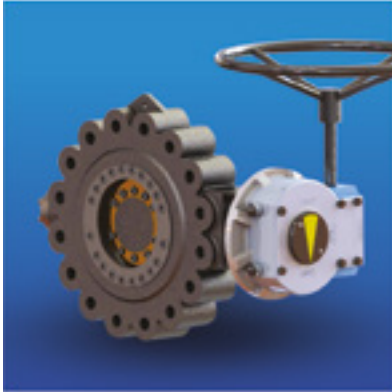

# Products

## Ball Valves

Process Valve Solutions has particular expertise in Ball Valves. Our range includes 3 piece and flanged in carbon steel, stainless steel, special alloys and bronze. We also supply Multi-Port Valves, Cryogenic Valves, V-Port Control Valves and Tank-Bottom Valves as well as making modifications including steam jackets, stem extensions and locking kits.

## Butterfly Valves

Our range of Butterfly Valves includes on-centre rubber seated, high performance double offset and triple offset designs. Materials include carbon steel, stainless steel, alloy steel and bronze with designs including wafer, lugged and double flanged.

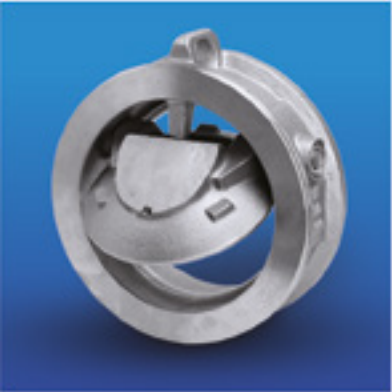

## Lined Valves

For corrosive chemical applications, we supply a range of Plastic Lined Valves, where an iron valve body is fully protected from the process using a fluorocarbon lining such as PFA, ECTFE or PVDF. We are able to supply Ball, Butterfly, Diaphragm and Check Valves of this type.

## Steam Equipment

We supply a variety of equipment for steam applications including Control Valves, Steam Traps, Globe Valves and Check Valves.

## Gate, Globe & Check Valves

Our Gate, Globe & Check range according to API, includes carbon steel, stainless steel and alloy steel materials with trims available according to the API standard. End connections are screwed, butt weld, socket weld or flanged.

## Relief and Reducing Valves

Pressure Relief Valves are critical to operating a safe process. Our range includes ASME VIII and API designs for general boiler duty and for petrochemical applications. These valves are sized for the application so generally made to order.

## Actuators

Our comprehensive Actuator range allows us to automate any valve using pneumatic, hydraulic or electric power supplies. We hold an extensive stock of pneumatic actuators for use on Ball and Butterfly Valves.

## Controls

To complement our range of Actuators, we hold Switchboxes, Air Filter Regulators, Solenoid Valves and Positioners in stock, allowing us to produce full Valve Automation Systems on fast-track deliveries – often same day!

# Our Proposition

We offer an individual service to each and every customer using our staffs 50 years of experience in the valve industry combined with a modern approach to effectively offer you an unrivalled service throughout your transaction.
